PROSYNC

MANAGEMENT CONSULTING FZC

COMPANY PROFILE · 2026

Project Management, Engineering & Consulting services for offshore & onshore projects

Your project. Our responsibility.

PROSYNC Management Consulting FZC · Sharjah Research Technology & Innovation Park · United Arab Emirates

A consultancy that takes responsibility for the result.

Your project. Our responsibility.

PROSYNC Management Consulting FZC is a Sharjah-based project management consultancy serving the oil & gas and maritime sectors across the UAE and GCC. We provide project controls and PMO leadership, embed specialist commissioning, marine and HSE personnel into EPCM and EPC teams, deliver conceptual, FEED and detailed engineering, support tendering and technical bid evaluation, and prepare claims and dispute cases.

We were incorporated in December 2024 at the Sharjah Research Technology & Innovation Park and began delivering in 2025 on an ADNOC Offshore development under a Tier-1 EPCM contractor. That first engagement shaped how we operate: short, clear contracts; one supplier for the client to deal with; and people who sit inside the project team and carry its deliverables.

Our slogan is a working rule, not a strapline. When a PROSYNC specialist joins your team, the deliverable carries our name as well as yours. We report to your project director, we meet your standards, and we answer for the outcome.

Our commitment

To deliver each engagement with precision, reliability and a client-first approach, so that every project not only meets but exceeds the standard it was contracted to.

Key facts

Legal name PROSYNC Management Consulting FZC	Licence SC242064001 · SRTI Park, Sharjah
Incorporated 30 December 2024	Licensed activities Project management services and consultancy; projects management engineering & technical feasibility studies; management consultancy
VAT registration TRN 105148122200003	Sister company ROTEX Rotating Experts FZCO, Dubai

Embedded, accountable, flexible.

Embedded, not advisory

Our people sit inside your project team, carry your deliverables and report to your project director. We take responsibility for outcomes, not just recommendations.

One contract, full administration

Specialists are contracted through PROSYNC. We handle vendor registration, timesheets, VAT-compliant invoicing and consultant payments, so your procurement team deals with one supplier.

ADNOC and international standards

Our reference work is on ADNOC Offshore assets under a Tier-1 EPCM contractor. Safety and quality are the conditions of every engagement, not a slide in the proposal.

Flexible engagement

Full-time, part-time or interim. Day rate, milestone or lump sum. Scaled up or down as the project phase demands.

Core values

P Precision — accuracy and detail in every project phase

R Reliability — a partner the client can depend on

O Optimisation — resources, time and process used well

S Synergy — people, process and goals working together

Y Yield — measurable results and maximised project outcomes

N Network — strong relationships across the GCC, MENA and Europe

C Commitment — seeing the project through, to the standard agreed

Seven service lines.

Each line is something we have delivered or are resourced to deliver today. We quote only the lines relevant to an opportunity, and say plainly when something is outside what we do.

Project Controls & PMO

Interim, part-time or embedded PMO leadership and project-controls teams.

- Planning & scheduling, WBS and baseline development, schedule risk analysis
- Cost control, cash-flow and productivity modelling, earned value management
- Progress measurement, KPI dashboards and client reporting
- Change control, delay analysis and interface management
- Operational-readiness assessments, handover dossiers and close-out

Specialist Project Personnel

Experienced specialists contracted through PROSYNC into client EPCM/EPC teams, under PROSYNC contract and administration.

- Commissioning & start-up managers and engineers
- Marine and offshore consultants (marine spread, vessel and installation interfaces)
- HSE managers and advisors
- Project, construction, interface and project-controls engineers
- Full contracting, timesheet, invoicing and compliance administration

Conceptual, FEED & Detailed Engineering

- Conceptual engineering: option selection, concept definition and technical feasibility
- FEED engineering: basis of design, process and layout definition, FEED packages and cost/schedule estimates
- Detailed engineering: multidiscipline design deliverables, with licensed partners where statutory sign-off is required
- Engineering studies: constructability study and scheduling, cost estimation, value engineering, design reviews and HAZOP support

Tendering & Technical Bid Evaluation

- For bidders: requirements review, bid strategy, proposal preparation, clarification management
- For owners and EPCMs: contracting strategy, technical bid evaluation (TBE), risk assessment, award recommendation
- Contract negotiation support and post-award mobilisation

Claims, Disputes & Litigation Support

- Contract and entitlement review; notice and claims strategy
- Claims preparation and substantiation; delay and quantum analysis
- Expert reports and support to legal counsel in mediation, arbitration and litigation
- Negotiation and settlement support

Risk & Stakeholder Management

- Risk identification, qualitative and quantitative assessment, response planning
- Risk registers, Monte-Carlo schedule and cost risk analysis, continuous monitoring
- Stakeholder mapping, engagement strategy and communication planning

Business Consulting

- PMO and project-management operating-model design and set-up
- Process, governance and performance improvement for contractors and consultancies
- Market-entry and vendor-registration support for firms entering the UAE and GCC oil & gas market
- Business-partner search and introductions across the GCC, wider MENA and international markets: local sponsors, JV partners, agents, subcontractors and suppliers
- Partner due diligence, teaming agreements and MoU/JV structuring

Where we work.

Based at SRTI Park, Sharjah, serving the UAE and GCC, with partner networks across the wider MENA region and Europe.

Oil & gas — offshore

Platforms, subsea and marine spread, hook-up and commissioning. Our reference environment is ADNOC Offshore.

Oil & gas — onshore

Processing facilities, pipelines, brownfield modifications and shutdowns.

Ports & maritime

Marine works, port infrastructure, vessel and installation interfaces.

Also served through partners: renewable energy, power generation, industrial and process plants, where the project-controls and commissioning disciplines transfer directly.

REFERENCE PROJECT

ADNOC Umm Al Dalkh (UAD) EPCM project

Consultant services to a Tier-1 EPCM contractor, 2025–2026: Commissioning Management, Marine Consultancy and HSE Management, contracted and administered by PROSYNC under a single purchase order, delivered to ADNOC and international standards.

Client type Tier-1 EPCM contractor	Asset owner ADNOC Offshore
Disciplines Commissioning, marine, HSE	Scope CCSU scope drafting, marine spread, HSE management

Led from the front.

Yassin Trojet

General Manager

Yassin leads PROSYNC's operations, client relationships and business development. An engineer by training (Hochschule Düsseldorf), he has spent more than 13 years in the rotating-equipment and turbomachinery services sector, including eight years as Regional Sales Manager for the Middle East and Africa, based in Dubai.

He has built and managed partner networks, agent agreements and service contracts for owners and EPC contractors across the GCC, North Africa and Europe, and brings that network to PROSYNC's partner-search and market-entry work.

PROSYNC is a sister company of ROTEX Rotating Experts FZCO, Dubai.

Our associate network

PROSYNC works with a vetted network of senior associates: commissioning and start-up managers, marine and offshore consultants, HSE managers, project-controls leads and discipline engineers with ADNOC and international-operator experience. Each is contracted and administered through PROSYNC for the duration of the engagement.

Regional reach

Through our own network and our sister company, we can locate and introduce business partners — local sponsors, JV partners, agents, subcontractors and suppliers — across the GCC, the wider MENA region and international markets, and support international firms entering the UAE.
